taking the AIDS medication....

I was introduced to ProMatrix Whole-body Cleanse and decided to try since all else had failed me.....

I notice they were gentle on my stomach and I did not have to vomit the next day though I still have gas... Within 2 weeks I was able to eat all those gas-causing foods such as broccoli, peas, etc.... I sleep better and think more clearly... I now have a quality of life I did not have before..... I am back at work. AND I AM GAINING WEIGHT!!!

Note: David continued using ProMatrix Whole-body Cleanse and below is his latest report

I had my doctor's check-up and lab results came back and it is just amazing! My "viral load" (viral infection) was not detectable and my T-cells (white cells) count had increased from around 135 to more than 165!! I feel really good and never healthier and had not even had a cold last winter whereas my doctor thought I would not last the winter of 2008 due to potential viral infections, etc! I am very pleased and will continue to use the ProMatrix to help me to continue to recover my health, I especially use the entire ProMatrix Whole-body cleanse, I inhaled, I bathe, I ate organic foods and I am 70% raw food and if I can not get organic I spray ProMatrix on my foods which turns it into organic. The proof is in the pudding, my T-cells are still climbing. **David**

Another update from David

Again my blood test results were good. My viral load is still undetectable and my T-cells are still 165....

I must add that after taking ProMatrix probiotics for over 5 months I noticed that the thrush (Candida albicans) I always had under my tongue was gone. Candida is normal for people who are HIV/AIDS...

I also noticed that the mucous that I constantly had in my lungs is clearing up. My lungs feel cleaner and I noticed my breathing is better. And better yet in two months I will start training for mountain climbing. **David**
